

SYSTRONIC CL4XX SERIES

COMPACT STARTER MODELS

This effective and cost-effective single-chamber cleaning system series in stainless steel makes it easy to get started with cleaning stencils, screens, squeegees and misprints.

In addition to the entry-level model CL410, the expansion level CL420 with separate rinsing is available for a wide variety of cleaning tasks. For higher throughputs, the CL420-D offers the option of cleaning two stencils at the same time. The CL430 variant with its three tanks is configured for 2 different cleaning processes, such as soldering frames and stencils.

There is space for sieves in special sizes up to 1200 x 1200 mm in the CL422.

The CL420ex comes into play when cleaning the screen with

flammable solvents. Built according to the current ATEX regulations, the system, which is operated completely without electricity, can usually be operated without any special explosion protection measures.

The stable stainless steel design, the low investment volume and a fully automatic spray cleaning process are just some of the many advantages of the CL4XX system series. Unique pressure jet cleaning arms through which a larger amount of medium is conveyed and effective convection drying ensure short process times with an impressive cleaning result.

Easy to use, fast and economical system models for reproducible cleanliness of your stencils. Inexpensive solutions that convince!

THE SMART CLEANING SOLUTION FOR STENCILS, SQUEEGEE, MISPRINTS, SCREENS - SYSTRONIC CL410 / CL420 / CL420-D / CL420EX / CL430

Technical data CL4XX Series

Single-chamber systems

External Dimensions

Height	1825 mm
Width	910 mm (1340 mm as CL430)
Depth	1405 mm

Max. part dimensions 800 x 800 x 60 mm

Exhaust

Diameter	160 mm
Volume	500 m ³ / h

Tank capacity

Cleaning tank	75 l
Rinsing tank (CL 420)	75 l
Cleaning II / Rinsing II (CL430)	75 l

Weight approx. 350 - 550 kg

Fine filter

Cleaning	1 candle filter 20"
Rinsing (CL420 / D / EX)	1 candle filter 20"
Cleaning II / Rinsing II (CL430)	1 candle filter 20"

Return filter / per tank

Fleece filter	1
Fabric filter	1

Cleaning media

water based
Solvent (only CL420EX)

Noise level < 69 dBA
